Get to know your camera

5.0 Mega pixels resolution sensor
Video clips
Audio record
Web camera (Webcam function, Windows XP/Vista compatible only)
Built-in Microphone Voice recorder
Built-in flash Light
TV output
2.4” LTPS real color display
Operating (downloading photos) for Windows XP/Vista/Windows 7 and MAC 9.x and X.x
Macro mode

Functional parts

1- Strap hook
   Hook for attaching the wrist strap to the camera.

2- Shutter
   Press this button to take photographs or to start/stop recording a short video clip.

3- Power on/off button
   Press this button to turn on, press again to turn off.

4- Self-timer indicator
   Blinking when the self-timer function is operating.

5- Flash light
   Use the built-in flash to give the subject extra lighting if it is in dark surroundings (the best flash distance is recommended within 1.5m.).

6- Macro switch
   Macro mode: Select this mode to take close-up photographs (distance 11cm - 18cm).
Normal mode: Select this mode to take photographs from 0.5m - infinity

7- USB interface  Via this connection, you can download photographs and video clips to a computer.
8- AV port  For television connection.
9- Lens  Records the image to be taken.

Note: Keep the lens clean. Dirt and fingerprints will affect the quality of the picture.

10- LCD screen  Display photographs, video clips, camera setting and menu.
11- Busy LED  When the indicator is lit, the camera is busy.
12- Left/ display  For menu LEFT selection, and LCD display on / off.
13- Menu  For camera setting.
14- Mode  Press it to select different mode.
15- UP  UP & Digital zoom in
16- OK  Press it to confirm changes.
17- Right/flash light  For menu right selection, and selection of flash light mode.
18- Down  Down & Digital zoom out
19- Playback  Press it to enter playback mode.
20- Delete  Press it to delete the photo in playback mode.
21- Battery door  2xAAA alkaline batteries
22- SD card slot  SD card slot.
23- Tripod  To fix the camera on tripod.

Using the camera

Installing the batteries

1. Open the battery door.
2. Insert 2 AAA alkaline batteries into the camera.
3. Turn on the camera.
   Press the POWER button to turn it on (press it again to turn off).

Inserting a memory card (not included)

This camera has built-in internal memory. This memory can be extended with a
SD memory card (not included).
Follow the instructions given below to insert the optional SD memory card into the
camera.
1. Turn off the camera first.
2. Insert the SD card into the camera.

Note: There is only one right direction to insert the SD memory card into the slot.
   Do not force the card into the slot, or else it may damage both the camera
   and the SD memory card.

Note: The SD memory card must be formatted before taking photographs. See
   the following sections for more information.

Formatting the memory or SD card

1. Press Menu button
2. Select Setup setting by right key.
3. Press OK to confirm and select by up or down key.
4. Press OK to format the card or memory.

Setting the resolution

The camera can be set to different resolutions.
1. Press MENU to set proper resolution.
   Resolution: VGA(640x480), 1.3M(1280x960), 3.1M (2048X1536),
   5M (2560 x 1920), 8M (3264x2448), 12M (4032x3024)
2. Six different resolutions will be displayed. Select the desired resolution by
Taking photographs

1. Turn on the camera by pressing the ON/OFF button.
2. Press MODE to set the camera to photo mode (A).
3. Depending on the distance to the object being photographed, use Macro switch to adjust the distance. Select the flower symbol (♀) if you wish to take a close-up photograph (11cm – 18cm).
   If you wish to take photograph of surroundings or people (0.5m - infinity), set the Macro switch to Normal mode (▲).
4. If you are not sure if there is enough lighting, turn the automatic flash (光电) on by pressing the flash button. (If the battery power is too low, the flash won’t be activated).
5. Use the LCD screen to aim the object you wish to photograph.
6. Press Shutter button and hold the camera steadily for 2 to 3 sec, until the LCD display turn on again.

Caution: 1) Taking picture for fast-moving object is not recommended.
           2) Image may be distorted when taking picture in a moving vehicle.

Zoom in and out

The camera can zoom in up to 8 times.
1. Zoom in by pressing the ▲ or ▼ button, a number will appear on the display.
   8.0 is the maximum zoom.
2. You can zoom in by pressing the UP or DOWN button.

Taking photographs using self-timer function

You can use the self-timer function when you wish to take a photograph for yourself or when you wish to photograph for an object where the camera must be as still as possible, for example on the stand.
1. Set the camera to photo mode.
2. Press the MENU button. The quick menu will appear.
3. Press ▼ to self-timer mode, press OK and ▲ or ▼ to set the delay time:
   2seconds / 10 seconds / 10+2seconds or off.
4. Press the OK button to confirm. The self-timer function is now ready for use.
5. Aim at the object you wish to photograph.
6. Press the SHUTTER button to take a photograph.
7. The self-timer indicator LED in the front will blink.
8. The photograph will be taken after the timer reaches the delay time that you pre-set, and the camera will beep once.

**Recording video clips**

1. Press the MODE button to select the video clip mode.
2. Press the SHUTTER button to start recording video, press the SHUTTER button again to stop recording. The video clip will now be saved as an AVI file in the camera memory.
3. Press MENU to set proper resolution, EV and WB, and press OK to confirm.

**Playback photographs**

1. Press PLAYBACK button, press ◀ or ▶ to select the video clip or photo.
2. Press ▲, it will go to 2x zoom, press ▲ again to 3x zoom…… up to 8x.
3. Press “OK” and then Press ▲, ▼, ◀ or ▶ to shift the image.
4. Press MENU to select SLIDE SHOW, and then press OK to confirm. The pictures saved in your camera or your SD card will be displayed in sequence automatically.

**Playback video clips**

1. When video clips are displayed, press OK to play, and press DOWN key to stop.
2. Press OK to pause the playback
3. Press Playback key to exit.

**Recording voice**

1. Press MODE button to select the voice recording mode,
2. Press SHUTTER to start voice recording and press it again to stop.

**Delete photographs and video clips**

You can choose to delete a single photograph / video clip, or delete all the photographs / video clips in the memory.

**Delete photograph**

Follow the instructions given below to delete photograph.

1. Press PLAYBACK to enter the playback mode.
2. Press the MENU button and select Delete One/Delete All, press OK to confirm.
3. If you select Protect picture, your current file or images can not be deleted.
4. Press MENU to exit.

**NOTE:** Select ‘Deleting All’ and Press OK to confirm, all the pictures will be deleted.

---

**Shortcut to delete one picture**

1. Press PLAYBACK to enter Playback mode.
2. Select the photo (video) you want to delete, press DELETE button.
3. Press OK to confirm.

---

**Installing the camera driver**

The driver in the CD has to be installed, under following applications:

For Windows XP / Windows Vista: Using as a PC cam only. (Download picture /video is driver free)

---

**Uninstalling old drivers and devices**

There is a chance for a conflict between the new driver and an existing driver in the computer. In that case, it is better to remove those drivers before installing the new driver.

1. Enter Windows ‘Safe Mode’ (press F8 when starting Windows and then select ‘Safe Mode’ from the menu which will be displayed).
2. Click on ‘Start – Settings – Control Panel’ and double-click on ‘Add/Remove Programs’ icon.
3. Find all the programs for similar, old devices and remove these by clicking on the ‘Add/Remove’ button. When in ‘Safe Mode’, it is possible for some programs to appear twice. In that case, remove all the programs which appear twice.
4. Restart the computer.

---

**Installing the driver for Windows XP / Windows Vista**

**Note:** Make sure all other programs are closed during the installation process.

**Note:** During installation for Windows XP/Vista, you may receive a message saying that the driver has not been signed. This does not cause a problem for the functionality of the program. Please click "Yes" to continue.

**Note:** For example, ‘D: \’ is used to indicate the CD-ROM drive. This may be different for your computer.
1. Insert the CD-ROM into your computer's CD-ROM drive. The installation program will start automatically. If it does not start automatically, please do the following:
   a) Select ‘Run’ from Windows Start menu.
   b) Type [D:\SETUP.EXE] and click on ‘OK’ to start the Software Installer.
2. The Software Installer will appear.
3. Select the language you wish to use for the installation.
4. Click on ‘Install driver’ to start the installation of the camera driver.
5. Follow the on-screen instructions.

Connecting the camera

The camera can be connected to the computer in two different modes: Mass Storage Device, or as a PC camera for video conferencing on the Internet.

Connecting as a mass storage device

1. Turn the camera on by pressing the ON/OFF button.
2. Press MENU button and press RIGHT key to select the Setup setting.
3. Press ▼ button to set USB connection.
4. Press ▲ or ▼ button to choose the Disk Drive mode.
5. Press OK to confirm.
6. Connect the camera to the computer.
7. Windows will automatically detect the camera. You can use this camera as a removable disk.

Connecting as a PC camera

When you connect the camera as a PC camera, you can use the camera as a web cam for video conferencing on the Internet by using Windows NetMeeting or Windows Messenger.
(You must install the driver before connecting the Digital Camera to your computer.)
1. Turn the camera on by pressing the ON/OFF button.
2. Press MENU button and press RIGHT key to select the Setup setting.
3. Press ▼ button to choose USB connection.
4. Press ▲ or ▼ button to choose the PC camera mode.
5. Press OK to confirm.
6. Connect the camera to the computer.
7. Windows will automatically detect the camera. You can use this camera as a
web camera.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

NOTE
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio / TV technician for help.

**Declaration of Conformity**
The following information is not to be used as contact for support or sales. Please call our customer service number (listed on our website at www.oregonscientific.com, or on the warranty card for this product) for all inquiries instead.

We
Name: Oregon Scientific, Inc.
